

Dr Chua's bedroom romp

Where the hidden cameras could have been located

► Forensic officers believe the video camera used to catch Dr Chua Soi Lek in the act had been fixed on the frame of either a painting hanging on the wall or a mirror above the dressing table.

► Another video, which showed the couple having sex from four different angles, was taken in a dining room linked to the bedroom. The cameras there are believed to have been fixed at the door and on other paintings in that room.
