

» PATH OF DESTRUCTION

➔ Storm path □ Affected areas ■ Satellite-detected flood water

■ **Bay of Bengal:** Cyclone Nargis crosses Bay of Bengal and hits Myanmar coast early Saturday. The Cyclone was a Category storm with winds of up to 190kmh, sending waves up to 3.5m high.

■ **Bogalay:** Low-lying Irrawaddy delta region is worst hit by the tidal waves, which sweep away most of the homes in the city of Bogalay. Some blame the destruction of mangrove forests in the region which could have acted as buffer between the tidal waves and residential areas.

■ **Yangon:** Cyclone moves on to pound main city of Yangon.
