

Key strategies in the National Cybercrime Action Plan

Prevention

- Educating the public, especially the youth and the elderly, on staying safe in cyberspace.

Response

- Enhancing cybercrime-fighting capabilities with the latest technology and training.

Legislation

- Ensuring that laws are constantly reviewed to be relevant and effective.

Partnerships

- Working with the private sector and institutes of higher learning to develop new tools.
- Cooperating with regional and international partners, such as Interpol and Asean.
